**Casters included for more
mobility and stability.**

I was very skeptical when I ordered the Dust Deputy thinking no way would it trap fine dust particles but I have been so thrilled with my stationary Oneida dust collection system I thought I'd try one to use between my remotely located 6 x 48 belt sander and my Fein vacuum. I just finished over 3 hours of 220 grit sanding on my 6 x 48 and was I surprised to find over a quart of fines in my Dust Deputy. That amount would have surely fouled my Fein filter part way through the project. Upon checking the Fein I found only a few large solids in the bottom of the tub that I picked up when I vacuumed the floor. Nice product--well done

***Captures 99% of the dust before it reaches your shop vacuum.
No filter clogging and no loss of suction.***

Clear Plastic Static Dissipating Dust Deputy®

Part #	Description	Price
AXD000004	2" Inlet Clear Plastic Dust Deputy® Kit Includes: Static Dissipating Plastic Cyclone with 2" inlet / (2) 5 gal. plastic drums / 61" of 2.5" hose / Hardware	\$99.00
AXD001004	2" Inlet Clear Plastic Dust Deputy® Cyclone - D.I.Y Includes: Only Plastic Cyclone / No Accessories	\$49.00
AXD001004SD	2" Inlet Black Plastic Dust Deputy Cyclone - D.I.Y SD Includes: Only Plastic Cyclone / No Accessories	\$69.00

U.S. Patent # 7,282,074

D.I.Y. drum must be strong enough to overcome vacuum pressure. (e.g. - 5 gal. plastic drywall bucket). We recommend at least 90 mil side thickness otherwise the container may collapse when in use. The black cyclone is more static dissipative than the clear cyclone and does not need any additional static reduction tape to use. All measurements and usage is the same.

How It Works:

Cyclone separates 99% of the dust before it reaches your shop vacuum. No filter clogging and no loss of suction.

Examples of Attaching Dust Deputy® to Vacuums

Clear cyclone is used for illustration purposes. Black SD cyclone can be used interchangeably.
